CAREER OBJECTIVE

Full-stack developer experienced in building web applications with the **MERN stack** and AI-powered applications using **Python, LangChain, RAG, and LLMs**. Focused on backend development, API integration, automation, and practical software solutions.

EDUCATION

Rungta International Skills University
B.Tech in Computer Science – CGPA: 7.8

Expected 2027
Bhilai, Chhattisgarh

- **Coursework:** DBMS, Operating Systems, Computer Networks, Python Programming, Fundamentals of AI

TECHNICAL SKILLS

Programming: Python, JavaScript, HTML, CSS, SQL
AI & Agents: LangChain, CrewAI, RAG, MCP
Web: MERN Stack (MongoDB, Express.js, React.js, Node.js), REST APIs, FastApi, WebRTC, WebSocket
Databases: MySQL, MongoDB
Automation & AI Platforms: n8n, Claude Code, Antigravity, Cursor Ai
Tools & DevOps: Docker, Git, GitHub, VS Code, Jupyter Notebook, Ollama, Postman

INTERNSHIPS/EXPERIENCE

Texserve Nexus Pvt Ltd | Freelance Backend Developer
• Developed a scalable e-commerce backend using **FastAPI, MongoDB, and Docker**, implementing JWT authentication, shopping cart, order processing, and clean architecture.

Friends Foods and Company | Freelance Full Stack Developer
• Built a meal delivery platform using **React, Node.js, and MongoDB** with real-time order tracking, admin dashboard, and secure authentication.

Probecell Journal | Freelance OJS Developer
• Deployed and customized **Open Journal Systems (OJS)** using PHP and MySQL, configuring DOI integration, PKP PN archiving, and journal publishing workflows.

PROJECTS

Vina Voice Chatting Extension | JavaScript, WebRTC, Chrome Extension API, WebSockets | [GitHub](#) | [Live](#)
• Built and deployed a real-time voice chat Chrome extension with **500+ downloads** and **200+ users** for multiplayer team communication.
• Implemented low-latency peer-to-peer voice communication using **WebRTC**, supporting **2,000+ voice minutes** across active sessions.
• Engineered **WebSocket-based signaling and connection management** to establish and maintain reliable real-time peer-to-peer connections.
• Integrated **Chrome Extension APIs** to provide in-game voice communication without disrupting the user's gameplay experience.

Autonomous Agentic RAG Product Research Platform | CrewAI, LangChain, Ollama, SerpAPI | [GitHub](#)
• Reduced manual patent research by **85%** by building a multi-agent research platform using CrewAI and LangChain.
• Achieved **sub-150ms** retrieval latency across **5,000+** technical documents by implementing semantic search with OpenSearch.
• Improved patent search accuracy by **30%** by integrating Ollama (DeepSeek R1) with SerpAPI for real-time analysis.
• Automated market intelligence and competitive product research by designing an end-to-end Retrieval-Augmented Generation (RAG) pipeline.
• Orchestrated multi-agent workflows for automated research, document retrieval, analysis, and LLM-based response generation.

YaariCircle – Meal Delivery Platform | MongoDB, Express.js, React.js, Node.js, WebSockets | [Live Demo](#)
• Developed a full-stack multi-role meal delivery platform using the **MERN stack**, processing **300+ orders per day** across the local delivery area.
• Built the complete backend with **Node.js, Express.js, and MongoDB**, supporting authentication, order management, user roles, and kitchen operations.
• Implemented **WebSocket-based real-time order tracking** and designed the system to support **10+ concurrent users** during active operations.
• Integrated **geolocation and JWT-based authorization** to streamline local food delivery, secure user access, and role-based operations.

CERTIFICATIONS

Claude Code in Action – Anthropic | Claude Code, Subagents
SQL Certified – Intellipaat | SQL
Foundation: Introduction to LangChain – Python – LangChain | LangChain, Python, LLM Applications
MERN Full Stack Development – Coding Spoon Edutech Pvt. Ltd. | MongoDB, Express.js, React.js, Node.js

POSITIONS OF RESPONSIBILITY

Team Leader – Full Stack Developer Club | Rungta International Skills University
• Lead a student developer community focused on **Full Stack Development**, coordinating projects, mentoring members, and organizing technical learning activities.
